Just a Heads-Up

These notes might apply to your order—just some helpful things to know:

- Super small text (anything under 10pt Arial) might not show up clearly. If it's tiny, it might get a little fuzzy!
- Light or white text/art can be tricky—dot gain is real! Bumping the weight up by 0.5 pt helps it print much better.
- Things might move around a bit. We stick to the suggested imprint zones, but products can shift, so designs outside that area might wander.
